

TREND MICRO CLOUD ONE™

A security services platform for cloud builders

CLOUD SECURITY SIMPLIFIED

With an exploding set of cloud infrastructure services and an increasing number of stakeholders involved in infrastructure and security decisions, the cloud has formed the perfect storm for security. In order to gain the benefits of the cloud and meet business objectives, cloud security needs to be made less complex.

Business requirements and DevOps processes demand faster application delivery, however, if you increase the speed of delivery, everything else must follow suit. For example, compliance, which changes based on industry, geography, and infrastructure, as well as protecting against evolving and increasingly sophisticated threat vectors.

INTRODUCING TREND MICRO CLOUD ONE™

Trend Micro Cloud One, a security services platform for cloud builders, delivers the broadest and deepest cloud security offering in one solution, enabling you to secure your cloud infrastructure with clarity and simplicity.

By considering your cloud projects and objectives holistically, Trend Micro Cloud One is able to provide powerful security, while you leverage all of the benefits and efficiencies the cloud offers your business. Comprised of multiple services designed to meet specific cloud security needs, Trend Micro Cloud One gives you the flexibility to solve your challenges today, and the innovation to evolve with your cloud services in the future.

You no longer have to find point products to meet the unique requirements of your infrastructure or work with the processes you've already implemented. With a comprehensive set of services, designed specifically for the cloud, Trend Micro Cloud One secures the different parts of your environment within one simple platform.

With support for all major cloud platforms, and solutions that integrate directly into your DevOps processes and toolchain, Trend Micro Cloud One is designed to provide the flexibility you need without slowing down your business or application delivery.

ONE POWERFUL SOLUTION

Customer's environments and infrastructures aren't standardized, and they tend to have a mix of legacy servers, virtualized data centers, and newer services, such as containers and serverless applications. Many customers also use multi and hybrid cloud strategies to meet their business objectives. We have the unique capability to offer leading security solutions for all of these customer scenarios across your entire environment, in one powerful solution.

TREND MICRO CLOUD ONE BENEFITS

Automated

Security as code lets your DevOps teams bake security into their build pipeline to release continuously and frequently. With built-in automation, including automated discovery and deployment, quick-start templates, and our Automation Center, secure your environment and meet compliance requirements quickly.

Flexible

Builder's choice. Security for your hybrid cloud, multi-cloud, and multi-service environments, as well as protection for any vintage of application delivery—with broad platform support.

All-in-One Solution

One platform that has the breadth, depth, and innovation required to meet and manage your cloud security needs today, and in the future.

EXTENDED DETECTION AND RESPONSE (XDR)

Trend Micro Cloud One™ - Workload Security includes detection and response designed for server, cloud workloads, and container platforms by leveraging the XDR capabilities of Trend Micro Vision One™.

WHATEVER YOUR CLOUD PRIORITIES ARE, WE CAN SIMPLIFY YOUR CLOUD SECURITY

We recognize that there are different drivers behind your constantly evolving cloud security priorities. We also understand all of the continuous work it takes to secure your complex and fast-paced multi-cloud environment—so let's simplify it.

Cloud migration: The transition to the cloud isn't as simple as clicking a button and having a hybrid and multi-cloud strategy is the norm. That's why we built the Trend Micro Cloud One platform with the ability to secure physical, virtual, and multi-cloud environments.

Cloud-native application delivery: Working hard to deliver fast and iterate often, you are leveraging code in new ways and from different sources, such as infrastructure as code, open source, and public code repositories, which can introduce additional risk. Making matters more complicated, you have adopted new cloud services and processes to help you meet your objectives. You need security that supports this dynamic, complex approach without slowing you down. Trend Micro Cloud One does just that, by providing solutions for DevOps, cloud storage, cloud workloads, containers, and serverless.

Cloud operational excellence: Organizations are adopting a cloud center of excellence model, with the goal of creating repeatable, consistent, secure, and compliant infrastructures that can be leveraged throughout the organization. Trend Micro Cloud One is optimized to be cloud efficient and will help you meet governance compliance and assurance requirements quickly.
